WELCOME

Dear Colleagues,

On behalf of the Society of Genitourinary Reconstructive Surgeons (GURS), it is my great pleasure to welcome you to Minneapolis for the 5th Annual GURS Academic Congress, held September 25–27, 2025. We are delighted that you have joined us for what promises to be an engaging and inspiring gathering of our reconstructive urology community.

This year's program reflects the diversity and depth of our field, with sessions highlighting the latest advances in urethral stricture disease, prosthetics, urinary diversion, neurogenic bladder, and transgender health. From the Young Urologists Program to the Patient Voice sessions, the agenda has been designed to foster collaboration, encourage dialogue, and ensure that every participant—whether a trainee, seasoned surgeon, or allied colleague—finds meaningful opportunities for learning and exchange.

We are especially honored to host our first keynote speaker from outside the urology community, lectures, debates, case discussions, and the Charles Devine Lecture, alongside presentations of cutting-edge research and video demonstrations. The Congress also celebrates our global mission, with updates on multi-institutional initiatives, international collaborations, and recognition of outstanding contributions to the field.

Equally important, we hope you will take advantage of the many opportunities to reconnect with old friends, meet new colleagues, and build networks that will last well beyond this meeting. From the Welcome Reception to our daily discussions, these moments of camaraderie are at the heart of what makes the GURS community so vibrant.

We are grateful to our faculty, sponsors, and especially to each of you for your dedication to advancing the science and art of genitourinary reconstruction. Together, we will continue to push the boundaries of innovation and patient care.

Welcome to Minneapolis, and welcome to the GURS Academic Congress. We look forward to an outstanding meeting.

Warm regards,
